KOMPAN®
Let's play

Let's play

Play is instinctively human. When we're children, play is how we have fun, learn, socialise and are physically active. As we get older, it's really the same – play is key to a long and happy life.

Through our inventions, we have set new global standards for ways to play, seeking to create the world's best playground and sport & fitness solutions.

We do this because we have a passion to create healthier and happier communities by inspiring people across the world to play more.

We do it the KOMPAN way, where product development is based on thorough research, extensive user involvement, and close collaboration with experts through the KOMPAN Play Institute. We then tailor the right products for the specific user and customer requirements. This creates products that motivate people of all ages and abilities to play more, be more physically active, and learn and socialise more – while always having fun.

We never compromise on safety and our choice of the highest quality materials creates extremely durable solutions that stand the test of time and weather. We are also conscious that our designs should be beautiful – both in their own right and as a contribution to their architectural and natural surroundings.

Today, digital technologies change the way we live our lives. This includes the why, how and where we play and how physically active we are as individuals, families, and communities. We take responsibility for driving this change, as we have historically – to continuously lead the industry and reinvent play for everyone's benefit.
Let's play!

NEWS 2018

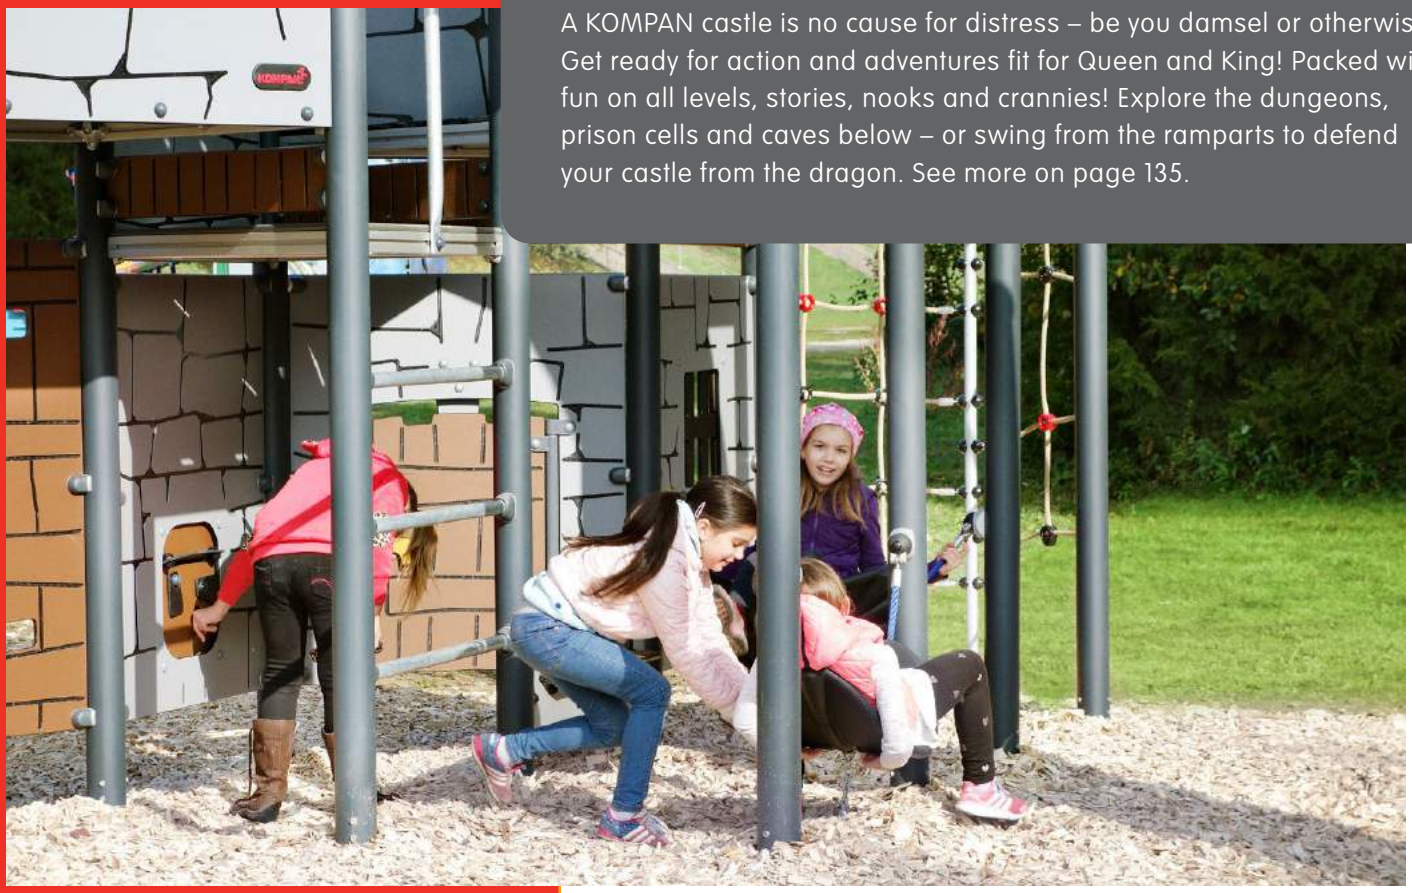

SWASHBUCKLERS AND BUCCANEERS TAKE NOTICE!

If ye playground be in dire need of an overhaul and barnacles have settled on your springers look no further than these amazing new ships from KOMPAN. Built on a rock solid structure equipped with a host of adventurous activities both top-side and below deck you will find all you need for kids to create their own high seas adventures right here.
See more on page 134.

MOMENTS CASTLE

A KOMPAN castle is no cause for distress – be you damsel or otherwise! Get ready for action and adventures fit for Queen and King! Packed with fun on all levels, stories, nooks and crannies! Explore the dungeons, prison cells and caves below – or swing from the ramparts to defend your castle from the dragon. See more on page 135.

NEWS 2018

DYNAMIC CAROUSELS

KOMPAN carousels add innovation to the joy of spinning, attracting even teenage users and providing for children with disabilities. Apart from being great fun, the spinners help children practice and improve their sense of balance, their muscles and bone density. It's great exercise and supports children in navigating the world securely, with improved physical literacy and resilience.
In KOMPAN Play Institute interviews with older children, they state that spinning until they get dizzy is one of their favourite play activities.
See more on page 155.

THE TIPI CAROUSEL

The Tipi Carousel with Top Brace is a fun and thrilling play starter for social and physical play. The Tipi is a spacious, inclusive spinner, which welcomes all to whirl while lying, sitting or standing, with great support from the top brace. The Tipi invites and encourages social play, children helping each other on and off the carousel, pushing and pulling it to add speed to the play.
See more on page 155.

NEW KOMPAN PORTAL SWINGS

Thrill is the main motivator of physical play, and swings are truly thrilling. Learning how to swing takes practise and once children have learned how to swing, it will bring hours of joy. Additionally, it will train the child's vestibular system, in coordination and sense of balance. These are fundamental motor skills, crucial to make the child able to get around in and manage the world.
See more on page 110.

WARRANTY

A playground is only as good as it is reliable

LIFETIME* WARRANTY

- Galvanised structural parts
  - Steel poles
  - Cross beams
  - Floor frames
  - Top brackets
- Stainless steel hardware
- EcoCore™ and other HDPE Panels**1**

15 YEARS WARRANTY

- Engineered Robinia timber

10 YEARS WARRANTY

- HPL floors & panels
- Galvanised and aluminium metal parts with painted top layer
- Other galvanised metal parts
- Other stainless steel parts
- "S" Clamps on Hercules rope
- Solid plastic parts
- Non-painted metal parts
- Other engineered timber

5 YEARS WARRANTY

- Resin coated plywood plates
- Hollow plastic parts
- Other painted metal parts
- Springs & ball bearing assemblies
- Rope & net constructions
- Concrete elements
- Flexotop virgin EPDM

2 YEARS WARRANTY

- Moveable plastic & metal parts
- EPDM rubber membranes material
- Electronic components
- Flexotop™ recycled EPDM
- Sun shades & sail solutions

1. WARRANTY COVERAGE

This warranty applies to KOMPAN's products for the time periods described for each product type below and with the limitations described in this warranty. The warranty period applies from the date of purchase by the first customer. This warranty covers only defects in materials. KOMPAN's liability under this warranty is limited to repair or replacement of defective products, without charge, at KOMPAN's discretion. Defective electronic components will be delivered and changed by a KOMPAN ICON Professional installer free of charge.

2. WARRANTY APPLIES ONLY IF PRODUCTS HAVE BEEN PROPERLY INSTALLED AND MAINTAINED

The warranty only applies if KOMPAN's products have been installed according to the instructions provided by KOMPAN, and maintained correctly according to the KOMPAN Maintenance Manual. The warranty for the ICON electrical components is dependent on those products being installed by an ICON trained and approved installer.

3. NO COVERAGE FOR ACCIDENTS, WEAR, TEAR, COSMETIC ISSUES, MISUSE OR VANDALISM

This warranty does not cover any damage caused by accident, improper care, negligence, normal wear and tear, surface corrosion on metal parts, discoloured surfaces and other cosmetic issues or failures due to misuse or vandalism. Natural changes in wood over time are considered cosmetic issues and not covered.

4. PRODUCTS INSTALLED NEAR WATER

Products installed in direct contact with chlorinated water or saltwater (Waterparks), or products installed with occasional contact with such water or installed so close to the shore they are subjected to salt spray are not covered by the KOMPAN warranty for any defects caused by corrosion. Products installed in coastal areas, within 200 meters from the shore, will only be covered by the warranty for half the period of the standard product warranty in relation to defects caused by corrosion. KOMPAN's Lifetime warranty if applicable is limited to a 5 year warranty in relation to such products.

5. THIRD PARTY SUPPLIED PRODUCTS & SERVICES

KOMPAN provides non-KOMPAN branded products and installation services performed by certified third party suppliers. This general KOMPAN warranty does not apply to such non-KOMPAN branded products and installation services, which may carry their own warranties. KOMPAN will pass on information on such warranties where possible.

*KOMPAN's LIFETIME warranty is in effect for the lifetime of the product until the product is uninstalled and/or taken out of use. In addition, KOMPAN's general terms & delivery conditions apply and supplement this warranty.

HOW TO READ THE CATALOGUE

Total safety zone size.

Age group (key user group)

Accessible for all children, with or without disability, according to the Americans with Disabilities Act.

Hours shown under the products are total installation hours, without excavation, for an inexperienced installer. The volumes given in brackets are required excavation and concrete volumes.

Total height of product. (Shown when relevant).

Max free height of fall.

CHILD-CENTRIC DESIGN

AGE APPROPRIATE PLAY

TODDLERS
PLAY TO LEARN
1–4 YEARS

- Build sensory motor skills
- Stimulate language development
- Stimulate understanding of the world

GROWING MINDS IN LITTLE BODIES
Physical exercise is essential for a toddlers overall development. Toddlers need to move to relate to the world around them and understand it. The coordination of gross motor skills and spatial understanding is trained when moving through varied play areas, moving up and down, above and below, over and under. Hand-eye coordination is trained through varied tactile input and manipulative elements.

THE RIGHT SIZED CHALLENGE
It's important to remember just how *small* these children are. Toddler play equipment and areas should be designed with this in mind.

STIMULATE LANGUAGE AND COMMUNICATION
A key driver of language development is adult-child interaction. KOMPAN designs to support and encourage communication between ages in using themes recognisable to toddlers: elements that can be described, reported, named or compared spark conversations.

BEGINNERS IN FRIENDSHIPS
Research shows that toddlers engage in significant social interaction despite their limited use of spoken language. They make up repetition games and play them in groups and they make early parallel play together. Activities such as springers, small seesaws or tummy swings placed in pairs, encourage eye contact and play in groups of twos or threes can promote this.

PRE-SCHOOL CHILDREN
OUTSPOKEN PLAY
2-6 YEARS

- Role play
- Sensory motor skills – gross motor and fine motor skills
- Imagination and friendships

GROSS MOTOR ADVANCEMENT
Pre-school children need gross motor and sensory skill practice. The level of refinement in physical activity increases steadily. A variety of physical activities stimulating cross-body coordination, balance and proprioception is recommended. Jumping and running are important means of building bone mass.

IMAGINATION UNLIMITED
Pre-schoolers increasingly express themselves through spoken language. They use their imagination to act out scenarios, inspired by the social phenomena they encounter. Children's role play develops language, communication and understanding of the world. Play areas offer easily recognisable themes and can help promote this development.

UNDERSTANDING THE WORLD
Pre-schoolers grow to understand the cause and effect of phenomena in their surroundings, learning through play and first-hand interaction. Since children need to experience things to understand them clearly, playgrounds should provide opportunities for cause-and-effect play such as manipulating various items and materials, including natural materials. With a KOMPAN solution, you can be sure that this is built in!

CHILD-CENTRIC DESIGN

AGE APPROPRIATE PLAY

SCHOOL AGE CHILDREN

THE GOLDEN AGE OF CHILDHOOD

6+ YEARS

- Gross motor skills ABC: Agility, balance and coordination
- "Rule play" scenarios
- Friendships

UNFOLDING PHYSICAL EXCELLENCE

Children now seem able to do and learn almost anything. Physically, children now have the same proportions as adults and their proprioception and sense of balance grow better every day. School aged children can master basic coordination skills such as running, climbing, balancing etc. Because their range of skills is so broad, it's important to offer a wide diversity of agility and coordination challenges.

RULES PLAY RULES

6 to 12 year olds develop an increased understanding of other people through conversation and cooperation. They can manage play in bigger groups, and gradually grow from role play to "rules play". Games with rules are hugely popular and well understood, with school children enjoying positive competition. Through games with rules they can learn to win and lose in a balanced manner, considering others. But they also strive to exceed their physical comfort zones to gain even more skills, which should be considered when planning the playground.

ACTIVE LEARNING

Recent research shows that important life skills are learned easily through play. Waiting for your turn may be hard in the classroom but turns out to be much more understandable in the playground. Outdoor play environments, with age appropriate and varied play challenges, assist the concentration and readiness to learn within this age group.

TEENAGERS

SEE AND BE SEEN

10+ YEARS

- ABC: Agility, balance and coordination
- Speed, endurance and strength
- Places for socialising

STAYING ACTIVE

Teenagers' growth is so rapid (speedy/fast) that it dramatically challenges their sense of balance. They need to build up strength, endurance and speed. Opportunities to meet and move are crucial to teenagers, not least because physical activity seems to be declining in this age group. Statistics show an alarming growth in the number of teens suffering from obesity.

Teenagers say their favourite activities in play spaces are swings, climbing equipment, trim trails and ball game pitches. Activities that are challenging and seem somewhat daring are the most popular. Teenage girls tend to prefer less strenuous (vigorous) activities such as spinning, swings and equipment rather than ball games.

STAYING FRIENDS

During teenage years, social interaction with peers becomes more important than ever. Teenagers need to be with and make new friends, preferably in large groups. This is essential when designing for them.

MIND AND BODY

The brain still develops during the teenage years. Numerous studies show that physically fit teenagers are better learners, more emotionally balanced and better integrated into social networks.

TO BE FAIR, PLAY HAS TO BE INCLUSIVE

At KOMPAN, we believe that every child should have the right to leisure and play – regardless of their physical and intellectual abilities. This belief is in line with the United Nations' Convention on the Rights of the Child, the most widely supported UN convention ever. Over the last few years, most nations have signed the United Nations' Convention on the Rights of Persons with Disabilities, which recommends that public spaces be designed in accordance with "universal design" principles.

WHAT WE DO TO INCLUDE EVERYONE IN PLAY

The belief in inclusive play runs deep at KOMPAN. "Play Together" – or the idea that everyone should be included in play, is a foundational pillar in our philosophy of play. We design our products to be used universally and to accommodate activities that are relevant for all children. You will find universal design everywhere in our playgrounds, not least in the many openings and details that encourage play exchanges between children inside and outside the play elements.

THREE LEVELS OF INCLUSIVE PLAY

At KOMPAN, we divide playground activities into three categories:

- Ground level activities
- Elevated level activities
- Multi-level activities

The activities are based on the Americans with Disabilities Act's Accessibility Guidelines for Play Areas (ADAAG), which state that if there are an equal number of elevated and ground level activities, the playground can be defined as "universal design" and "play for all".

In addition to this, we also provide multi-level activities that can be entered and used from both ground and elevated levels, enabling more open and diverse opportunities for play.

SIX PRINCIPLES FOR UNIVERSAL, INCLUSIVE DESIGN

PRODUCTS THAT ARE UNIVERSAL AND INCLUSIVE SHOULD BE:

1. Accessible, 2. Multifunctional (when possible), 3. 360° design (play from all sides)
4. Equipped with diverse play opportunities, 5. Clear in colour and design signals
6. Provided with special solutions for special needs when relevant

PLAY THE KOMPAN WAY

'WOW' 'STAY' 'DEVELOP". Three little words are all it takes to prescribe "Play the KOMPAN Way". As simple as the three factors sound, they are equally complex to master and constantly reinvent as we tailor solutions to specific customer needs.

THE WOW FACTOR. When exposed to the opportunity to play on a KOMPAN site, your imagination and excitement ignite and drive your instinct to play; you feel the urge to get on the site and start playing or exercising with our inventions. The Wow Factor is a design approach that ensures you are drawn to the playground and sport & fitness ground.

THE STAY FACTOR. Once you are on the KOMPAN site and start playing or exercising, we seek to make you stay. We do this through age-appropriate solutions that continuously stimulate new ways of playing with the precise dose of challenge that is key to having fun and being physically active. Our Stay Factor also caters for nurturing social interaction: inspiring people of all ages and abilities to stay and play longer together.

THE DEVELOP FACTOR. When engrossed in play we learn and are physically active with intensity – often not knowing or sensing our own intellectual and physical development. Our Develop Factor is about using thorough research, involving users extensively and working closely with experts through the KOMPAN Play Institute as a way of designing products that grow the skills of the user in the play and exercise zone. With others and alone.

Our solutions develop physical skills such as motor skills, balance and coordination, including muscle strength and cardio. They also focus on intellectual learning, including language development, understanding cause-and-effect principles and constructing an idea. They always seek to do so while inviting social interaction through role-play, joining forces in a play or fitness activity or simply encouraging communication. This is why playing the KOMPAN way is memorable and develops users. The three factors are our approach to continuously reinventing play and sparking the human instinct to play.

THERE IS A SCIENCE TO THE KOMPAN WAY OF PLAYING

Research from our KOMPAN Play Institute is ingrained in every product and solution we offer. Our research center is dedicated to finding the benefits of play.

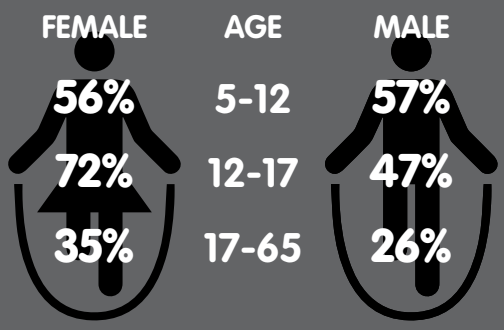

We do this with a mix of our in-house experts and external experts from around the world, as well as by involving users. We test hypotheses to avoid myths and preconceptions and we deliver facts that are key for product innovation and customer solutions.

To constantly raise the bar, we drive and take part in international research projects and find answers to questions like: how do we stimulate children to develop their physical skills through play? or, how do we design a play or fitness structure that motivates teens and adults to be active for at least 60 minutes a day? Once we have answers, they are ingrained in our innovations and solutions. And, naturally, we share our knowledge with experts, partners and customers.

SCIENTIFIC FACT:
The World Health Organization recommends children and youth to be active at least 60 minutes a day. Adults and seniors at least 150 minutes through a week. Play is a human instinct. It is also a field of science.

The World Health Organisation recommends that children and youth need 60 minutes of physical activity a day, adults and seniors need at least 150 minutes of activity throughout the week.

PERCENTAGE NOT MEETING THE MINIMUM RECOMMENDATION FOR PHYSICAL ACTIVITY:

% OF THE POPULATION WHO IS EITHER OVERWEIGHT OR OBESE

15 MIN OF EXERCISE A DAY IMPROVES CHILDREN'S LEARNING POTENTIAL

*WORLD HEALTH ORGANIZATION

TAILORING THE BEST SOLUTIONS TO CUSTOMERS

KOMPAN TAKES YOU FROM PLAN TO "LET'S PLAY" IN 5 STEPS:

- **THE RIGHT IDEA:** Together, we identify the primary users and their development needs for the specific site. The phase includes choice of products and materials and how the site will fit into its surroundings and specific conditions.
- **DESIGN:** Using the world's biggest and most flexible design platform to draw, we create a solution that maximises your Wow, Stay and Development factors. Calling upon the capabilities we have from many departments, such as the KOMPAN Design Studio and our Product Innovation teams.
- **VISUALIZATION:** 3D visulaization of your site for you to sign-off before we build and install the site. The visualization includes surfacing, play zones and product details.
- **INSTALLATION:** We deliver step-by-step instructions of how to install a KOMPAN site, or the option to choose one of our certified teams or partners to install the site.
- **SERVICE:** We offer to service the site on a regular basis, and our customers are offered guidance on how to manage their KOMPAN site after installation.

In any KOMPAN solution, we deliver a play or fitness design tailored to meet both users' and your specific needs, catering for the optimum Wow, Stay and Develop factors.

GREAT PLAYGROUND DESIGN

FIVE KOMPAN PRINCIPLES OF GREAT DESIGN

1. EXCEED USER NEEDS
Great design really is about understanding users needs and exceeding them with a twist. It requires in depth knowledge of users and their motivation to play longer, with variations that fit important criteria such as age and abilities.

2. USE THE LANDSCAPE
Play design is great when it becomes a natural part of its surroundings and landscape. This means understanding the character and shape of the location and using the unique features of light, shadows, terrain and accessibility.

3. MAKE PLAY ZONES
Creating smaller individual play spaces rather than one big surface is an important feature of great play designs. Large and small playgrounds can be designed into different organic shaped zones with a variety of motivating requirements.

4. USE THE RIGHT PRODUCTS
Choosing the right products is about users needs and aesthetics of each individual product. Great design brings the right equipment together, so that they neatly complement each other and invite people to stay and play longer.

5. DESIGN THE SURFACE
Surfacing is tricky but if it designed well it can really boost the play experience. It underlines the nature of the products and helps define the play zones adding important value to the playground.

SAFE CHALLENGES

To play freely children must feel safe, secure and at ease, to develop they must also push their boundaries and challenge their environments in unexpected ways. This is an essential part of developing their mental and physical abilities, as it is how they learn to anticipate and cope with risks. Our playgrounds are built to accommodate these two principles, providing a safe and challenging playground for the children.

CUSTOMER FOCUSED SUPPLY CHAIN

THE FUN STARTS WITH EXPERTLY MADE PRODUCTS AND IMPECCABLE SERVICE

At KOMPAN, we are committed to using only the best available materials for our products. Our products are certified, extremely durable and built to stand the test of time.

We use environmentally friendly materials, and once a product has reached the end of its life cycle, the majority of the materials can be recycled and serve new purposes.

We have built a highly advanced, lean and scalable manufacturing operation. That when combined with our flexible and reliable delivery and installation service, allows us to take full responsibility, not just for our products, but for their installation and for the finish of the whole playground or sport and fitness area. Ensuring it is completed on time and with our signature quality.

By taking full responsibility of the supply chain and creating high quality products. We are able to offer unrivaled warranties combined with industry leading installation and service solutions that follow rigorous guidelines and certified standards. To us, the whole customer experience is as important as the play itself.

ORGANIC ROBINIA

REINVENTS NATURE PLAY WITH MARKET-LEADING PLAY CAPACITY

KOMPAN have focused on getting play back to nature with the launch of Organic Robinia hard wood equipment. In doing so, we have brought the uniqueness of our classic and modern playgrounds into these designs.

The KOMPAN Organic Robinia designs thus provide market-leading Stay and Develop factors where users improve their language skills and logical thinking. Our challenging track ride, for instance, develops muscle strength and collaborative interpersonal skills with lots of fun. In addition, our Organic Robinia design has built-in unique sensory play – take the desk and crane, for example.

Our design sets new standards for the use of Robinia, as it is modular, providing endless ways of combining towers, slides and swings, to mention just a few options. This give us a cost-effective way of tailoring solutions to our customers.

The environmentally friendly Robinia wood has a high content of naturally occurring preservatives. That's why it doesn't need to be treated for rot, while having an extreme resistance to splintering, humidity damage and water penetration.

Available with FSC®-certification

Our Robinia constructions are all assembled before being shipped to make sure all the parts fit together to deliver the KOMPAN way of playing. We also always offer a service package as part of any Organic Robinia solution, as natural wood requires continuous service.

CASTLES

...AND SHIPS

The Robinia castles will give any park a regal touch: the castles are architecture for the play princes, princesses, kings and queens. With their scale, the Robinia Castles allow for a wide range of ages playing together and invite the whole family for a royal play day.

The Robinia ships make a fleet of unbeatable imaginative play motivators. From the yoal to the huge schooner, these ships were crafted for play sailors with an imagination to take them anywhere.

SAND & WATER PLAY

Sand and water are two simple materials that feed the imagination and creativity of children of all ages. The different textures of sand mixed with water play make way for hours of fun and creativity.

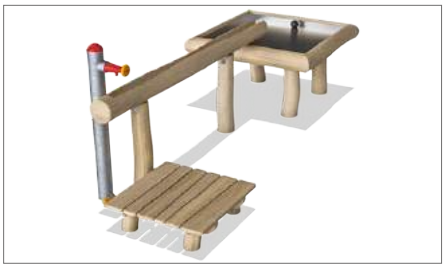

This play activity develops tactile sense, encourages interaction between children of all capabilities, helps children understand 'cause and effect' and appeals to a broad age group.

Subject to change without prior notice.

PLAY DESIGN

COLOURFUL PLAYHOUSE AND AGE-APPROPRIATE PLAY

After the Springer, KOMPAN made the classic playground more inviting. This was done though colourful playhouses, which invite children to play on their own or in groups according to their age and abilities.

The designs connect the outside and inside of the playhouse, with several ways to get in and out, providing a feeling of being safe.

Tactile elements encourage learning and social interaction while star shapes in the roofs appeal to the sense of wonder when sunbeams create patterns on the inside floors. Porches and benches allow high play capacity, stimulating children's cognitive and social emotional play such as role-play, verbal interaction and language development.

KOMPAN has many years of experience in making sure that a classic playground does what it is supposed to: be beautiful, inviting, challenging and great fun for long periods. And we keep developing new solutions and challenges for children even in this classic category.

THE WORLD'S MOST FLEXIBLE PLAY TOWER SYSTEM

One of KOMPAN's biggest challenges was inventing a flexible play tower system with the ability to be tailored to any request for a specialized play experience, and with the use of different materials. A giant step away from inflexible solutions that are characteristic of the playground industry. Everything plays together.

KOMPAN panels and posts – even ropes, ladders and slides – can be combined in our flexible core solution to stimulate specific skills and drive lasting physical play for different age groups.

Our patented tower system contains themes like ships and castles, all tailored to fit the needs of our users. And, due to the flexibility and possibilities of the design platform, we continuously develop new unique solutions together with our customers, which have never been built before. In addition, special customer needs like enhanced vandal-proof design or the choice of colors is part of our play tower system.

MOMENTS™

PLAY PANELS FOR LEARNING
In addition to age-appropriate size and scaling, the Mini portfolio also features a number of new play-based learning panels. The panels support a number of skills and competences such as fine and gross motor skills, cross-co-ordination, abstract thinking and emotional development.

A PERFECT SOLUTION FOR DEVELOPING TODDLER AND PRESCHOOL CHILDREN
Completely customisable and market leading quality, Moments Mini brings customisation to a new level. Moments Mini brings customisation to a new level. Choose between a number of options including slides, play panels, post materials and more. Get the play structure that perfectly fits your users' needs.

MOMENTS™

MOMENTS™ COMBINATION SYSTEM

Our newly designed combination system offers a large variety of play activities and material option, to fulfil individual requirements in any playground setting. All standard play structures are available in three different colour combinations; two types of post material; two types of slide and several options for anchoring requirements.

If you are looking for something a little different to the options below, get in touch and we will help you to create your own unique play structure.

Classic red/blue/yellow

Nature green & grey

Urban lime green & grey

Plastic slides (PE)

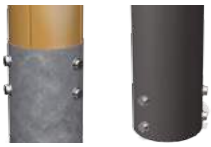

Stainless steel slide

Pine wood posts

Steel posts, powder coated
(Mega Deck - Steel posts only)

Surface & in-ground
steel anchoring

Full Flexibility

Prices remain the same no matter which colour, post material or anchoring type you choose.
Depending upon your choice of slide material, the price can be found below the pictures.

MOMENTS™ RAMPS

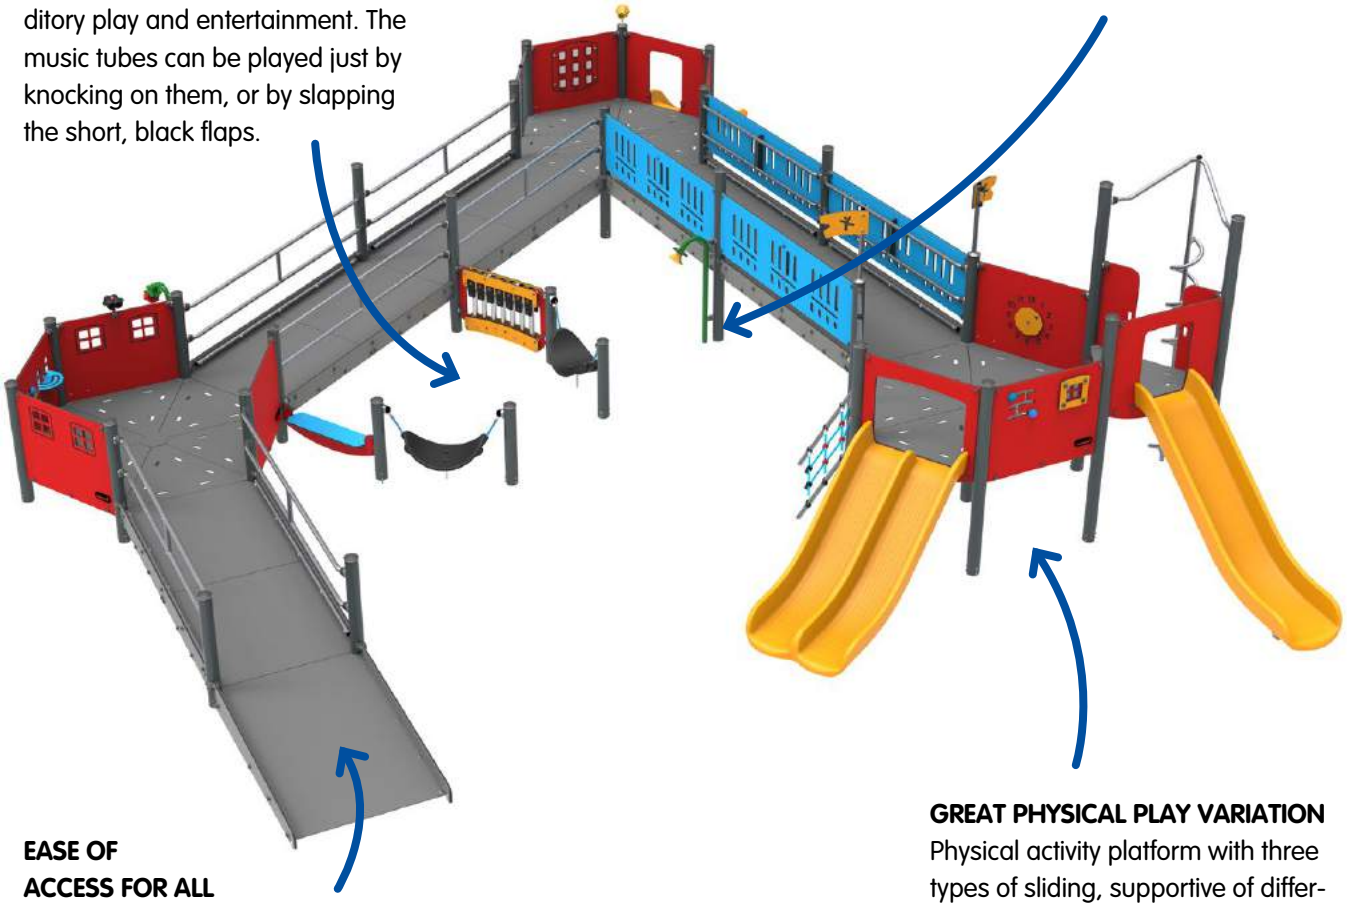

KOMPANs playground ramps are playful bridges to elevated play activities. They motivate play in users with disabilities as everyone else.

The new ramps are designed to improve and encourage play, being true to KOMPAN's proud history of inclusive design, dating back more than 30 years. Play on and around the ramp: There are play activities on the outside of the ramps and below the platforms, providing play for more users. Play panels encourage interaction between users on and around the ramp. Varied sensory play: The new ramps tick the boxes in play development of physical, social-emotional and cognitive life skills, thanks to a rich variation in visual, mobility, tactile and learning play activities.

Play for all abilities: Children with disabilities, like all other children, love the thrill of fun movement with peers. MOMENTS Ramps offer a good variation of dynamic, thrilling activities as well as spaces to go to for quiet play.

INTEGRATED SENSORY AND SOCIAL PLAY
Inner court play area with soft hammocks for parallel play and gentle rocking, bench table for a firm seat and music panel for auditory play and entertainment. The music tubes can be played just by knocking on them, or by slapping the short, black flaps.

GREAT SOCIAL & COGNTIVE PLAY
Cooperative play and communication, stimulating the child's cognitive development among others by mastering communication through words.

EASE OF ACCESS FOR ALL
Flexible ramp with good handholds at two heights and a gradient to provide easy access for wheelchairs and walkers.

GREAT PHYSICAL PLAY VARIATION
Physical activity platform with three types of sliding, supportive of different abilities. Climbing entrance for the ones who want fast access. Lots of manipulative, sensory and cognitive play panels.

* Assumes machine excavation
Corocord hours does not include civil work.

MOMENTS™ SCHOOL AGE

KOMPAN'S new school age assortment is designed to provide age appropriate play for school age children. Our play equipment and play panels are created in close co-operation with the KOMPAN Play Institute, verified by user group interaction and incorporated into new play structure design.

The assortment contains a number of standard products in different sizes including challenging Mega Deck play structures. Some new products are predesigned to provide easy accessibility for disabled children to allow them to participate in play with other kids on the playground.

All standard products are available in three different colour lines, two different post materials, three types of roofs, several slide options and several types of anchoring. Play activities can be selected to match individual preferences. For urban settings we have designed a special vandalism proof material combination.

Classic red/blue/yellow

Nature green & grey

Urban lime green & grey

Urban lime green & grey

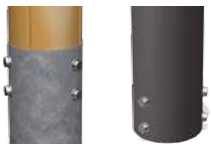

EcoCore™ HDPE panel and roofs

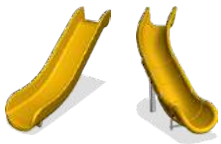

Urban aluminum panel, floor and roofs

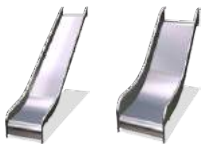

Pine wood posts or
Steel posts, powder coated
(Mega Deck - Steel posts only)

Surface and in-ground steel anchoring

Plastic slides (PE)

Stainless steel slide
Single or extra wide

Enlarged play area with shading.

High quality shades & suspension.

Large play capacity & inclusive design.

INTEGRATED SUNSHADES

KOMPAN has designed an integrated shading solution that maximises the shaded area considerably. Integrated shades are available for MOMENTSTM Combination System KOMPAN shade sails are manufactured from Commercial 95 High Density Polyethylene (HDPE).

A knitted shade cloth is manufactured solely for tensioned sun shade structures. The material is treated with UV stabilizers to give it a very long life in direct sunlight.

KOMPAN shades will not rot or fray and the high quality lock-stitch construction gives superior tear strength. The shade sails are constructed from commercial grade knitted shade-cloth with up to 96% UV block.

In a light rain the water will run off to the lowest point but in a heavier downpour the water will drain through the small holes.

ELEMENTS™ PRESCHOOL

EVERYTHING HAS A PLAY PURPOSE

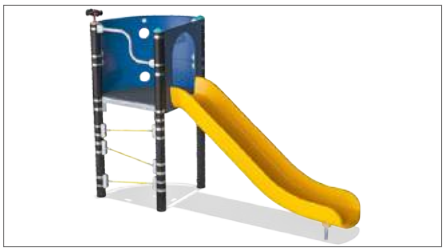

KOMPAN ELEMENTS includes slides, fireman's poles, nets and ladders. Advanced materials provide outstanding durability, while allowing playful details, such as holes to peek through, finger mazes to feel and follow, and washboards to strum on.

ELEMENTS for the school age group is changing the game in playgrounds by enabling children to safely push the limits of their own abilities. The special design from KOMPAN makes every single surface an exciting invitation to play.

With footholds and handholds everywhere, children can climb around the entire structure without ever touching the ground. Thanks to new activities and components, the routes children can take are even bigger, and the challenges more thrilling than ever.

ELEMENTS™ SCHOOL-AGE

WE INVENTED A NEW STANDARD FOR FUN AND CHALLENGING PLAY WITH 360 DEGREE DESIGN – WE CALL IT ELEMENTS

Thankfully, playgrounds don't come with play instructions: children are inherently curious, and masters of innovation.

Hence, we got the idea and made the unique design of ELEMENTS 360 by observing how children, seeking new challenges, would climb on the exterior surfaces of regular post and platform playgrounds.

Our design offers lots of play experiences on the inside of the structure, and more challenging adventures await on the outside.

Hence, the same structure provides progressing play opportunities that follow the child's development and willingness to be challenged. This design sets a new and exciting standard for the category, both functionally and aesthetically.

CLASSIC PLAY

KOMPAN INVENTED A NEW WAY OF ROCKING, AND WE HAVE BEEN ROCKING THE WORLD SINCE 1970

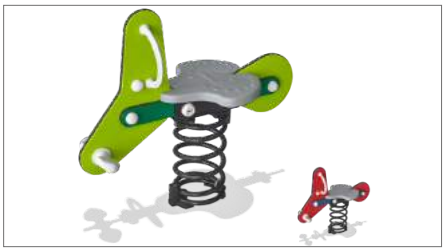

This is where it all began: A red hen on a bright blue spring. The Crazy Hen was the world's first play design that delivered a fun and better functional alternative to the traditional seesaw. And, you didn't even need a friend – or a counterweight – to get rocking!

The benefits are real. The novel rhythmic 360-degree movements stimulate language development with young children and build their understanding of causality when the force of their body creates a counter-movement. With no compromises on safety.

Preschool teachers and parents have often told us how much they love the Crazy Hen and other Springer products. Simply because it makes children want to play and have fun.

SWINGS

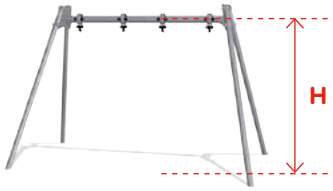

AN ALL-TIME FAVOURITE THAT HAS AN IMPORTANT PLACE IN ANY PLAYGROUND PLANNING. OUR SWINGS COME IN VARIOUS DESIGNS TO ACCOMMODATE BOTH CHILDREN WHO ARE USED TO THIS ACTIVITY AND TODDLERS WHO ARE JUST GETTING STARTED. DEVELOPS A SENSE OF BALANCE AND SPACE, IS EXCITING, MULTIFUNCTIONAL AND SAFE AND SUPPORTS SOCIAL PLAY.

At KOMPAN we strive to develop modern, flexible and highly durable product designs for all ages and abilities. Our swing offering is a good example of this. For 2018 we have updated our steel swing frames design to be extremely scalable for all customer demands and further made it available in both galvanized and coloured versions.

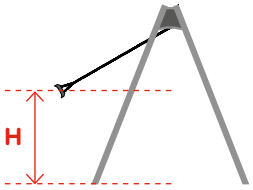

Thrill is the main motivator of physical play, and swings are truly thrilling. Learning how to swing takes practise and once children have learned how to swing, it will bring hours of joy. Additionally, it will train the child's vestibular system, in coordination and sense of balance. These are fundamental motor skills, crucial to make the child able to get around in and manage the world.

Portal Swings - unlimited flexibility and modularity

Portal swings are a modern update on a traditional favourite, constructed from galvanised steel. The swings are available in three heights: 2.0m for preschool, 2.5m and 3.0m for school age playgrounds. This highly modular system makes it possible to offer multi-bay swings with as many additional bays as you wish. Each section can be equipped with standard, toddler, cradle or bird's nest seats. Anti-wrap suspensions are available for both standard and cradle seats.

NEW BIRDS NEST SEATS

Well designed swing seats are essential to a beneficial play experience.

KOMPAN is proud to introduce our two new bird's nest designs. They both focus on user friendliness, component quality and impact safety. The new seats are available with a rope seat or a moulded shell seat.

KOMPAN designed the new bird's nest swings seats to be light in weight and greatly improved impact safety. Soft, shock absorbent bumpers with non-slip surface makes the swing seat extremely user friendly.

Birds Nest Rope Seats

- Improved seat comfort with new rope connectors.
- Reinforced seat and swing ropes.
- Red, black or sand coloured cords in seat.

Birds Nest Shell Seats

- Safe, weight reduced seat.
- Second to none user comfort.
- Integrated handles and drain openings.
- Grey, green, dark blue or lime green colour options.

* Assumes machine excavation
Corocord hours does not include civil work.

A-Frame Swings – unlimited flexibility and modularity

A-Frame swings are the classic playground swing. KOMPAN's new A-Frame swings are designed with unlimited flexibility in mind. Offering options for post material, anchoring type, swing seats, chain materials, swing hanger suspension and deco plates. This modular system makes it possible to design multi-bay swings with as many additional swing sections as required. Each section can be equipped with either standard, toddler, cradle or bird's nest seats. Anti-wrap suspension is available for both standard and cradle seats. The A-Frame swing is offered in two heights, 2.0m for preschool and 2.5m for school age.

Deco plates

THEMED PLAY

Themed play to spark to imagination

KOMPAN Imaginative play equipment tantalises with themes children identify with, that inspire play, spark the imagination and support the development of important social skills. The bright colours welcome the child and inspire playfulness while also clearly signaling spatial relations to the child.

Subject to change without prior notice.

MOMENTS™

A playground equipped with our Toddler range allows children to crawl, climb, swing, slide, jump and run – it's an ideal place to begin discovering the outside world. Helps develop sensory motor skills, supports parallel play and 'cause-and-effect' play, offers the perfect proportions for the toddler age group and provides endless play activity.

Subject to change without prior notice.

SUPERVISED AREAS

The concept of learning in its widest definition is the cornerstone of KOMPAN's philosophy, and play is certainly at the heart of our company. KOMPAN's new educational play designs are a symbiosis of play and learning. With two themes built in to each play item, they are inspiring play motivators that assist caregivers in supporting the child's development through play in compliance with the Early Years Foundation Stage curriculum.

PIRATES

SWASHBUCKLERS AND BUCCANEERS TAKE NOTICE!
If ye playground be in dire need of an overhaul and barnacles have settled on your springers look no further than these amazing new ships from KOMPAN. Built on a rock solid structure equipped with a host of adventurous activities both topside and below deck you will find all you need for kids to create their own high seas adventures right here.

Below deck and accessible to the generally younger audience you'll find numerous activities built around the Stay and Develop factors that allow kids to pass time while confined to the brig – or searching for treasure below the surface of the sea or in the cargo hold.

Above deck your little brigands can swing from the deck with all the rush and excitement provided by our track-ride or have them scale the ropes to take our exhilarating more than 6 meter long steel slide.

With all the stuff to explore and try, the stories can go far and wide across the seven seas! Expect your little pirates to try all their parlaying skills when negotiating if they can stay for just a few more minutes. And who knows even all you landlubber grownups could end up being carried away by the high tide of seafaring adventure and fun.

Built from recycled and recyclable materials that are durable and maintenance free, expect your seafaring adventures to be safe and reliable – and for the ships to look great for years to come.

...AND CASTLES

READY THE TURRETS!
MAN THE RAMPARTS!
A KOMPAN castle is no cause for distress – be you damsel or otherwise! Get ready for action and adventures fit for Queen and King! Packed with fun on all levels, stories, nooks and crannies! Explore the dungeons, prison cells and caves below – or swing from the ramparts to defend your castle from the dragon.

Climb the giant spider web in the cavern below the massive keep or sign up for guard duty as you patrol the ramparts keeping an eye out for the Robin Hood and his band of rogues. In the cellars you'll find loads of activities built around our Stay and Develop concept – redesigned and configured to support all sorts of role-playing action and fun.

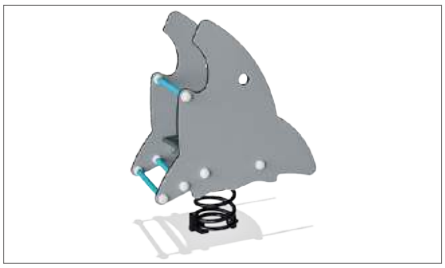

From the ramparts you can swoop across the moat using anything from a slide to our super fun track ride. And just as importantly we have whole complement of nets and climbing activities ready for you to scale the castle walls as you sneak into the castle to meet the wizard and steal away his formula for gold!

From the smallest gatehouse to the largest keep KOMPAN castles can accommodate every site and age range and provide countless hours of fairy tales and adventures – all while you can rest assured that the maintenance free products made from recycled and recyclable materials keeps your KOMPAN castle safe, reliable and good as new for years to come.

STORY MAKERS™

STORY MAKER, AN INVENTION OF A STORY ON THE OUTSIDE AND A SECRET PLAY SPACE ON THE INSIDE

To young children, this means a two-level space filled with bright colors, friendly shapes and rounded edges. STORY MAKERS is one big play invitation to role-play; firefighter or princess one day and a pirate captain the next. The novel elements of STORY MAKERS are figurative and easily identifiable, while the physical play experience caters to the dramatic developments we see in motor skills for young children.

STORY MAKERS offer the unique feature of changing the panels. You have multiple options in the product to begin with and can add new panels that deliver new imaginative play without changing the entire playground.

THE SMART PLAYGROUND™

HANS CHRISTIAN ANDERSEN

THE FAIRY TALES OF HANS CHRISTIAN ANDERSEN - THE LITTLE MERMAID, THE UGLY DUCKLING AND THE TINDERBOX - ARE LOVED BY CHILDREN AND ADULTS ALL OVER THE WORLD. THEY ARE PART OF CHILDHOOD.

KOMPAN Hans Christian Andersen play equipment is designed to work brilliantly as standalone without the digital layer as all other KOMPAN play designs. However the virtual, interactive digital layer offers yet another dimension to the playground. The KOMPAN Hans Christian Andersen Fairytale concept offers:

- age appropriate physical challenges for the 1-8 year olds
- a strong basis for language stimulation through role play
- inspiration for good social conduct through the moral insights and universal truths of the fairy tales (i.e. learning about bullying from "The Ugly Duckling" fairy tale)
- a vast number of digital games supporting learning, edutainment and fun

This way adults and children alike can share play, learning and cultural experiences, in the playground, back home or at school.

CAROUSEL & SPINNERS

KOMPAN carousels add innovation to the joy of spinning, attracting even teenage users and providing for children with disabilities. Apart from being great fun, the spinners help children practice and improve their sense of balance, their muscles and bone density. It's great exercise and supports children in navigating the world securely, with improved physical literacy and resilience.

In KOMPAN Play Institute interviews with older children, they state that spinning until they get dizzy is one of their favorite play activities.

TIPI Carousel

- Inclusive spinning for all users and play positions: standing, sitting, lying
- Benefits social play, allowing room for many, of all ages and abilities
- Benefits physical literacy and health training motor skills, muscles, cardio and bone density
- Life lasting quality: lifetime sealed bearing construction.

Twin Ring SKY Carousel

- Invites a wide user range, with two gripping heights and step support
- Designed to benefit upper body muscle strength, motor skills, cardio and bone density
- Benefits social play, allowing room for many
- Life lasting quality: lifetime sealed bearing construction

GALAXY™

KOMPAN INVENTED GALAXY, THE MODERN PLAYGROUND, GIVING TEENS AND TWEENS A REASON TO PLAY

Not that long ago, tweens, let alone teenagers, would look at a playground as a place for their younger siblings rather than for their own enjoyment – and with good reason. No one in the industry really offered fun and excitement for teens and tweens.

KOMPAN set out to change that and formed a design team separate from the rest of the company. The team had the task of solving the problem of how to ignite the urge to play in teens and tweens. And by observing how this user group behaved and were active on their own free terms, the team identified demands for intense physical challenges and unstructured play.

This led to designing GALAXY, which became the world's first solution to move away from the traditional post-and-platform and play tower designs, offering a free play structure with built-in activities that are responsive and dynamic. It also became the first free play design to include all people regardless of abilities.

GALAXY is often used as a crossover between KOMPAN play and fitness sites. And because of its beautiful curves and transparent design, GALAXY is a favorite with architects and developers around the world – it is regarded as the origin of modern playground designs.

We have a never-ending commitment to develop modern playground designs by continuously improving GALAXY and other new methods of play, as we keep moving forward.

ICON™

The design uses the element of friendly competition as an irresistible motivator and legitimizer for playful behavior with a self-conscious age group: the tweens and teenagers. As you team up, set the game objective and play away, you forget about everything around you. You just want to move, win and put yourself to the test with your mental and physical abilities.

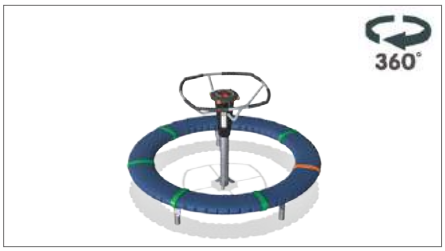

People never stop playing if the invitation is just right. But with changing trends and new technologies emerging all around us, our most important task is continuing to innovate play experiences that resonate with the children and adults of today and tomorrow.

Subject to change without prior notice.

CLIMBING

Climbing structures & nets

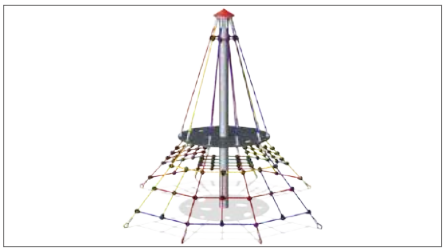

Climbing is an excellent activity for releasing excess energy and stress. Climbing equipment is well suited for both school and public playgrounds. Our equipment also provides perfect meeting places for children, develops body awareness, provides levelled play challenges and varied play activities.

Subject to change without prior notice.

BLOQX™

NEW TO THE WORLD: MULTIPLE CHALLENGES IN A SIMPLE, SCALABLE SYSTEM – BLOQX

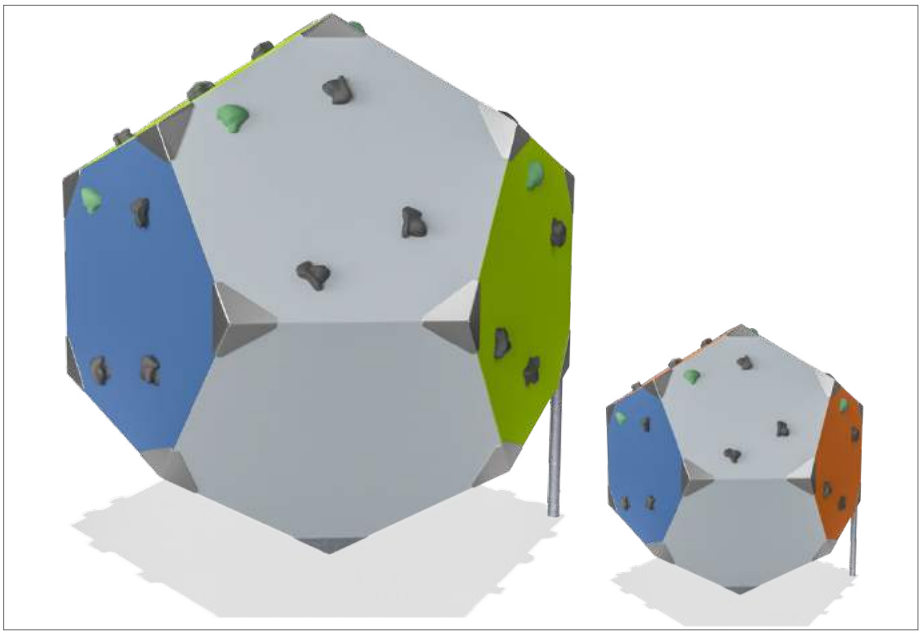

BLOQX is an entirely unique and intense climbing experience. Sometimes exhausting, even for a tween of teen! That's why the design caters for rewarding hang-outs on the upper surface of the pentagon shapes.

The design became a favored selfie platform, which tells us that BLOQX has made its mark with the target group, tweens and teenagers. That's pretty cool.

The sculptural concept behind the BLOQX elements makes the design a favorite among landscape architects looking for a solution that complements modern urban spaces.

COROCORD®

THE COROCORD SPACENET - INVENTING AN ENTIRELY NEW WAY OF CLIMBING

People are drawn to the unique rope structures we invented, as they suggest anything from a vertical game of tag to a private one-on-one chat on the polyhedral ropes. The design not only amplifies intense physical activity – it also provides space for social engagement and good fun.

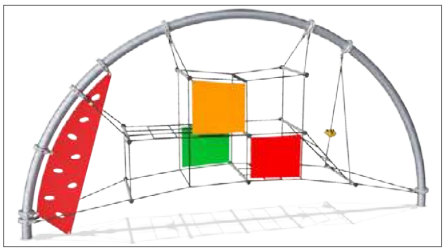

Due to the flexible concept of the three-dimensional climbing net, the COROCORD Spacenet can be designed in a multitude of ways to fit any purpose and landscape.

The structures make aesthetic, amazing play landscapes as they come at a height of more than 10 meters carrying an extreme number of people playing at the same time.

To cater for safe daredevil play, all COROCORD solutions deliver maximum safety with carefully designed catch zones from top to surface.

COROCORD® ROPE PARKOUR

Corocord Rope Parkour is inspired by the urban jungle of the trendy French sport. Both product lines share the almost limitless possibilities to combine individual rope net elements with each other, as well as other Corocord product lines.

COROCORD® AMUSEMENT NETS

Our Amusement Net series have been tremendously popular for over twenty years. The huge selection of elements creates unique, fantastic playground areas. While the Small Amusement Nets are mainly intended for children of preschool age, the large variant is ideal for school-age play and even young adults.

An additional benefit is the amusement nets can be combined with many other products from the world of Corocord rope play equipment.

MULTISPORT DESIGN

PLAYSPORT -
MEET AND MOVE!

Multisport pitches encourage children to explore sports while they socialise. Along with lots of games to play FREEGAME also provides an environment for social interaction which fosters new friends. It's a place for physical activities that promotes adolescents to lead an active and healthy lifestyle.

The FREEGAME multisport pitches offer two different designs – the CLASSIC version in wood and the innovative COSMOS version with HPDE panels. With facilities that grant 360° visibility, the children can feel safe while they play and chat.

This open, functional design has been installed in more than 1500 sites around the world and is seen as an ideal introduction to sports and recreation. FREEGAME is a welcoming place for young people of all abilities.

FITNESS DESIGN

THE DEVELOPMENT OF CROSS SYSTEMS ENCOURAGES MORE PEOPLE TO EXERCISE OUTDOORS WITH INTENSITY

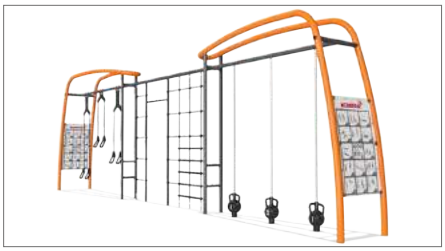

The uniqueness of the design is plentiful and builds on our understanding of the Wow, Stay and Develop requirements. Adjustable training levels that fit the individual during work out, combined with exercises known from indoors that are available for the first time in an outdoor environment - for instance our award winning kettlebell on a tube with perfect magnetic friction, means that people *stay* on a Kompan fitness site, because it always fits them.

Finally, users are supported with a KOMPAN APP that not only shows how to exercise in the best possible way, but also provides a full workout program and guidance on nutrition that suits you. In short, your online personal trainer, where you can join a user community, share results and be motivated. We know that motivation to exercise frequently and with intensity is the tricky part – hence our design also caters for the use of personal trainers connected to the specific Kompan Cross System site. Demands differ. That's why we have designed Cross Systems as a platform that can be tailored and scaled in countless ways to deliver the optimal functional fitness site for a given location.

Users say, the total design package motivates them to exercise more. We believe they are right. We have a never-ending commitment to develop modern playground designs by continuously improving Galaxy and other new methods of play, as we keep moving forward.

OBSTACLE COURSE

We used to run, walk, jump, crawl and climb as a natural activity. In the past, it was how we got most things done, but modern life has married much of our time to a screen and made us static. Obstacle courses take us back to our roots with natural movement for increased health and happiness.

PARK DESIGN

PARK DESIGN AND CLASSIC FURNITURE

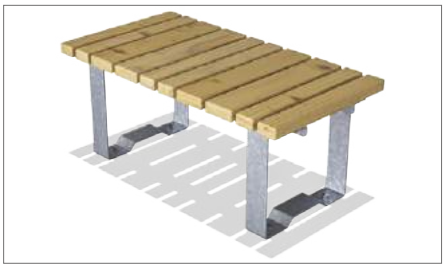

We spend a large part of our everyday life in the public space. The public spaces are characterized by being open and universal, but also offer the opportunity for social interaction and relaxation.

Park furniture is an indispensable part of public space and KOMPAN has therefore, created an assortment of comfortable park furniture inviting citizen to have a seat and relax. The challenge with park furniture is that they should be visible, but also blend into and enhance public areas. Our designs looks great along promenades and in town squares, shopping centers and entrances to buildings.

Classic designed park furniture with low maintenance materials such as hot dip galvanised steel and high quality wood. The environment is important to us and our park furniture is therefore produced under the greatest possible consideration for the environment

Within the Specialized International Exhibition EXPO-2017 the state of Kazakhstan decided to allocate 1 hectare for children's entertainment park on the territory of exhibition. The park contains 4 playgrounds for children of different ages. Kompan was chosen for its outstanding futuristic design and environmental policy, which perfectly combines with EXPO's concept "Future Energy" .

"EXPO kids park is an essential part of the whole EXPO-2017 because 25% of all visitors are kids. We are proud that our visitors are happy with the Park. Moreover EXPO kids park is the 3rd most visited attraction at EXPO-2017 only after Kazakhstan pavilion and Shell pavilion. It caters play needs of children of all age groups. Once children get to the park, they spend an average of 3 hours there and leave the park absolutely happy."

Erbol Shormanov
Deputy Chairman
National company, "Astana EXPO-2017" JSC
